SUMMARY

IT professional with 15+ years across support/helpdesk, servers, networks, and systems. ITIL-aligned with strong scripting and automation skills, reducing manual effort and improving system reliability to keep users productive.

SKILLS

Service Mgmt & Ticketing: Incident, Problem, Change & Service Request (ITIL/ITSM), Helpdesk; ServiceNow, Jira, Zendesk, Confluence, GLPI, Salesforce

Operating Systems: Windows Servers, Windows Desktops, Linux, macOS, iOS, Android

Directory & Server Roles: Active Directory (AD), Group Policy (GPO), Exchange/Mail, IIS, Apache

Networking & Virtualization: TCP/IP, LAN/WAN, VLAN, VPN, DNS, Wi-Fi, Firewall, VMware, Hyper-V, Citrix

Monitoring: Splunk, SolarWinds, Nagios, Cacti, IPMonitor, AWStats, Lightsquid

Scripting, Cloud & AI: Bash, PowerShell, Autot, Node.js, Python; Git, Jenkins, AWS; Claude, GitHub Copilot

Databases: MySQL, MS SQL, Oracle, SQLite

Hardware & Software: NAS, Switches, Routers, Modems, Printers, AV devices; Microsoft Office/365, Antivirus

EXPERIENCE

Quality Assurance Engineer, ICE Data Services Australia Pty Ltd July 2022 – June 2026

- Automated repetitive manual testing on the essCert platform by building a Playwright/TypeScript framework from the ground up, running it across browsers and cutting manual effort by 50%.
- Migrated the entire automation framework from Playwright to Cypress when tooling direction changed mid-project, preserving full coverage while the platform was rebuilt on a modern React framework.
- Owned final sign-off for production releases, gating each deployment behind a standardised pre-release checklist and smoke tests via Jenkins/Git, delivering zero critical incidents across 12 releases.
- Onboarded 2 engineers with a structured one-month plan, Confluence knowledge-base articles, and pairing sessions, halving ramp-up time from 2 months to 1.

Customer Support Consultant, ICE Data Services Australia Pty Ltd June 2015 – July 2022

- Documented and executed test plans, logged product defects in Jira, and led testing and troubleshooting for the SIMS go-live, coordinating fixes with developers and stabilising the system post-deployment.
- Served as first point of contact for all customer support under strict SLAs, reducing inbound volume by authoring customer-facing How-To guides in Zendesk that helped users self-resolve common issues.
- Migrated enterprise client systems onto the company's hosted Citrix platform and led eCertify/TridentGLOBAL version upgrades, generating recurring revenue while minimising client downtime.

Systems Analyst, GFT Global Markets Asia Pte Ltd – Singapore May 2012 – Oct 2014

- Automated routine server restarts, checkpoint validation and Nagios host/service onboarding on the DealBook trading platform with custom Bash scripts, cutting manual configuration effort by 50% & reducing human error.
- Delivered L1-L2 incident and service-request support across 8 global offices (US, London, APAC), handling 20+ mission-critical trading inquiries daily and meeting tight SLAs from interruption through to restoration.
- Became the Singapore team's SSL-certificate SME, centralising GFT/GAIN certificate monitoring into Nagios and fixing reporting and verification issues, then documenting the process in Confluence for team self-service.

Network Engineer, Fujitsu Ten Solutions Philippines Inc July 2006 – Mar 2012

- Built and maintained test environments & ran pre/post-deployment checks across multiple OS setups, isolating incompatibilities before roll out & verifying backups via test restorations to ensure near-100% availability.
- Owned network operations across the site, designing LAN layouts, configuring TCP/IP and VLANs, and maintaining structured cabling, while escalating leased-line faults to ISPs to keep connectivity reliable.
- Spearheaded open-source monitoring (Nagios, Cacti, AWStats, Mailgraph, Lightsquid) and scripted backups, antivirus updates, and alerting, replacing manual checks with proactive, self-reporting infrastructure.
- Reduced internal technical inquiries by 40% by authoring do-it-yourself troubleshooting guides for common issues and running targeted training sessions, curating the material in a shared knowledge base for staff and IT.

CERTIFICATION

- Microsoft Certified Professional
- Linux Professional Institute Certification (LPIC-1)

EDUCATION

Bachelor of Science in Computer Engineering
Polytechnic University of the Philippines – Manila

May 2006
